LANDLINE OR CELLULAR PERS

In the Home

This home-based device connects using a traditional landline phone jack OR through a cellular network. This service functions independently from any other telephone device. Activating the Pendant, Wristband or Fall Detection alert button initiates an emergency call to our 24/7 monitoring center. Trained response operators establish two-way voice communication, then assess the emergency and notify appropriate responders.

Product Features

-  Hands free, 2-way voice communication through the home-based unit
-  Pendants are shower safe, with a 5-10 year life span
-  72-hour battery backup in case of power outage to the home-based unit
-  Home-based unit recharges itself when power is restored
-  Activation range of 600-800 feet through walls, doors and windows
-  Automatically performs a silent, self diagnostic test every month

Alert Button Options:

Pendant

Wristband

Fall Detection

Individuals with a history of falls, fainting or seizures may benefit from this device.

MOBILE PERS + FALL DETECTION

At Home or Away

Whether indoors or out, at home or away, this “go anywhere” device with advanced GPS and Fall Detection can send help to your location anywhere in the United States. This lightweight device activates two-way voice communication to our 24/7 monitoring center when a fall is detected or the button is pushed.

Product Features

Petite & discreet designed to go with you wherever you go

Water resistant device for use in the shower

Wear it your way with the included lanyard or belt clip accessories

Fall detection capabilities and cancellation feature

Visual and audible recharging reminders

Automatically tests battery and signal strength daily

- + **GPS & Fall Detection**
Both features in one device
